AN AMERICAN ORIGINAL

THERE ARE MANY REASONS WHY GRADY-WHITE OWNERS LOVE THEIR BOATS SO MUCH

BY BILL SPRINGER

Some boats are like high heel shoes. They look great but aren't so practical. Others are stable and functional but as boring as a pair of black lace-ups. And then there are those special boats, like the models built by Grady-White in the United States since the late 1950s, that are as stylish and capable as a waterborne luxury SUV.

In fact, that's an apt comparison since the company's proprietary SeaV2® hull has been ranked number one in each of the eight marine studies ever conducted by J.D. Power and Associates. Hardly surprising: the hull shape was designed exclusively for Grady-White by C. Raymond Hunt Associates to ensure a nimble, smooth, and soft ride in a seaway no matter

the conditions. Combine this performance with Grady-White's legendary customer satisfaction and you get a good-looking boat you can believe in. What more do you need? ♦
