Fuel Capacity - Standard 361 Gal (1367 l)  
Weight w/o Engines 10,100 lb. (4581 kg)

Established in 1959 in Greenville, North Carolina, Grady-White has earned a reputation for building ruggedly elegant coastal fishing boats, developing great craftsmen, and establishing strong customer relationships. Popular in its home-away-from-home on the Southern California and Baja Peninsula coastal waters, the Canyon 336 is an exceptional example of what works in our unique fisheries.

The 336 features an advanced helm and windshield design that provides great visibility and lots of space throughout the cockpit. Because it can be powered by up to 900 horsepower, there is plenty of go in this center-console.

Since buying the company in 1968, owner Eddie Smith has set the bar high for the Grady-White team to “achieve uncompromising quality through exceptional attention to detail.” Today, this results in a company that embodies integrity, pride in work well done, and care for customer and community. It is a part of every boat they build.
