Grady-White Reimagines the Freedom 285

15-Aug-2019

After its continued success, Grady-White has reimagined the dual console, 28-foot Freedom 285 to fit in more comfort, storage and, of course, family fun!

The boatbuilder started with a sleek and sporty design update, including a new hardtop and expanded windshield. The redesigned helm features larger flush-mount electronics and an electric forward and aft adjustable captain's seat. Optional SureShade and Sunbrella sun protection can be added.

"The Freedom 285 is designed to provide more than ample space for socializing and fun, offering enough room for the whole family, as well as the gear that goes with on the water adventure. From dive gear to fishing rods, skis and tubes, there's space for everything on this great all-around boat," says Shelley Tubaugh, Grady-White vice president of marketing. "We're really excited to show customers how our forward-thinking engineering team has taken this exceptional boat and made it even better with this redesign."
