### GRADY-WHITE CANYON 336

An exceptional 33-foot center console, Grady-White's Canyon 336 provides the best of everything you'd expect, and more, in a boat of its size. The 336 starts with superior quality, reliability, safety, performance and long-lasting value Grady-White is known for. Its sleek styling elements are elegant, while abundant bells and whistles make it a well-outfitted fishing machine. Already a strong seller in this market, the new changes are bringing high demand. The redesigned console and T-top, with fully integrated windshield, widens walkways and expands the cockpit and bow spaces. An all-new helm design includes room for dual 17" flush mount electronic panels strategically located closer to the captain. From bow thruster and Yamaha "Helm Master EX" Digital Electric Steering to a water heater, air conditioner and diesel generator, the Canyon 336 is a high-performance boat that doesn't compromise Grady-White quality and comfort. All built on Grady's exclusive "SeaV 2" hull, it delivers a dry, soft ride. ([gradywhite.com](http://gradywhite.com))
