Canyon 376 - A Cabin You Can Live In

Center console fishing boats easily double as weekenders.

By Chris Woodward | Updated: February 18, 2021

Hard-core fishermen love center console boats. But even among the most dedicated anglers, many now seek more family time and improved convenience and comfort. That pushes boatbuilders to be creative.

At the same time, center console fishing boats have grown to 50-plus feet in length: That makes more room for berths and galleys and opens the door to center consoles as boats you technically could live on. Of course, you might not want to set up residence aboard these dressed-up models, but you could certainly plan an overnight or weekend trip in style.

Grady says the Canyon 376 helped define a new breed of center consoles that not only offer full offshore-fishing functionality but also the wide beam, roomy console-cabin interior, and luxury appointments of a cabin-style family boat.

The 376 can carry up to 38 rods in various locations, including lockable vertical holders inside the console. The deluxe leaning post houses a 41-gallon livewell with a clear lid, light, full-column inlet and overboard drain; a rigging station with freshwater sink; a 164-quart cooler; holders for a knife, pliers and lures; and lockable bulk and tackle-tray storage.

A 66-gallon fish box in the cockpit (available with an optional digital-control refrigerator/freezer), and two bow fish boxes, offering more than 125 gallons of storage, deliver all the room you'll need for refreshments, equipment and the day's catch. The cockpit features heavy-duty boarding doors at the transom and to port, each with a boarding ladder.

The console cabin features a settee that converts to a berth, a refrigerator and microwave and a standup shower. *Courtesy Grady-White Boats*

Step down the cherry stairs leading inside the lockable, air-conditioned console to find a stand-up shower area with curtain and a VacuFlush head, a galley with Corian countertops and deep stainless sink, plus a stainless refrigerator and microwave. A large settee converts to a berth with room for two, and offers storage along the side. The standard Fisher-Panda 5kW diesel generator maintains temperature levels in the cabin and at the helm.

The 376 tops 60 mph with triple Yamaha 425 XTO outboards. It cruises at 31.2 mph, turning 3,400 rpm, for 0.98 mpg. Other available power options include twin 425s or triple Yamaha F300s. A Seakeeper 5 gyro stabilizer is also an option.
