

## Best Center Console Boats to Consider in 2024

By Rick Shackleton | February 8, 2024

### Grady-White Canyon 386

**The Canyon 386 is packed with luxury and fishability.**

The Canyon 386 slides through seas with ease and keeps the crew comfortable in aggressive turns or blistering speeds on its proven SeaV2 hull. The triple Yamaha 450 XTO engines are controlled from a wide helm. Finished in black, the helm keeps down glare and enhances visibility. Grady's trademarked AirView2 (AV2) hardtop protects four captain's chairs, and features an electric sunroof and a vented integrated full-height windshield. The throttle and wheel are centered, with the Yamaha Helm Master Full Maneuverability joystick alongside. The system makes docking easier, and allows the boat to maintain position and heading while bottomfishing. It can also maintain heading while allowing the boat to drift a rip or bottom contour.

### Specs

<b>LOA:</b>	36'6"
<b>Beam:</b>	13'2"
<b>Draft:</b>	2'4" (motors up)
<b>Dry Weight:</b>	14,950 lb.
<b>Seat/Weight Capacity:</b>	Yacht Certified
<b>Fuel Capacity:</b>	410 gal.
<b>Available Power:</b>	Yamaha outboards

### What we like:

- Patented SeaV2 hull handles seas efficiently.
- Wide 13'2" beam provides room to seat four abreast at the helm, plus other things.
- Standard SeaKeeper gyro stabilizer smoothes out rolling seas.

### What could be better:

- Yamaha makes fine outboards, but we would like to see other choices offered as well, as different buyers have access to different dealers and have different engine brand loyalty.
