

Grady-White 191 Coastal Explorer

Looking to get into skinny water? This boat draws 14 inches but also holds its own when the wind and waves kick up, riding the SeaV² variable deadrise hull from C. Raymond Hunt Associates. Grady-White deftly balances fishing and dayboating in this model. The bow area is home to a divided insulated locker with fishbox/storage and a separate anchor locker. The platform transforms into a lounge area that connects with an insert pad to

the forward console. The console holds four rod holders and a 70-quart cooler or 17.5-gallon live well. Aft, you have a centerline 48-quart fishbox or an optional 12.5-gallon live well and a standard swim ladder. The boat can be powered with a single Yamaha F150 or F200. With the F200 it tops out at 51 mph and gets 5 mpg from 21 to 28 mph.
